This is my review of "A Dream For Aaron" after approximately 2 hours of gameplay.

I have been a fan of this developer since the Timore series which was played by Youtuber Markiplier. It was my first introduction to this developer and I really enjoyed watching the series, but never purchased any of the games personally.

Today I decided to finally purchase this new release before watching Youtubers, as I wanted a fresh and personal experience without spoilers and boy it was worth the purchase.

This game took me back to the arcade shooters of the late 90's and early 2000's. A game where you attack waves of different enemies and then attempt to survive long enough to face the level's final boss. I really had a lot more fun than I expected, and I can see myself trying new levels and challenges in the future.

I noticed a large variety of creatures with varying attacks, that relentlessly hunt the player down through a very creative map. The maps also seems to include day/night cycles and weather effects.

The difficulty level can seem quite high at first, but not to the point of raging. Once you come to terms with the map design and the little quirks the game presents to the player it becomes easier to defeat the level. It may take some trial and error to find out the best way to defeat enemies and it's smart to avoid running into dead ends, which can easily lead to your demise.

The game is also great for casuals and those who want a "pick up and play" experience.

The music was pretty cool as well, and I felt it helped set the mood and pace of the game quite well.

I would love to see a co-op mode for this game or even a VR style version as it would be a lot of fun. I also look forward to more levels and even crazier level design and maps.

On a final note, some scarier maps would be appreciated as well!

The game has a lot of potential and for the price tag you can't really go wrong.. Wow! I normally don't leave reviews for games on Steam even the developer (Vidas) earlier work on the amazing Timore horror game series! And I never thought he could make a series I would enjoy more than the Timore games (All of them). A Dream For Aaron had some glitches and bugs when it first came out but the dev has constantly updated the game and still adds new levels and more to keep you playing!! It is so fun and addicting but also don't forget it isn't a game that just holds your hand. If you die its back to stage 1 except for your level in the game doesn't change when you die. But everyone's playthrough will be different somehow compared to anyone else that plays and once you get a hang of the ways you unlock stuff and get challenges, etc. then you truly want to keep playing!!! Overall very well made and extremely fun game!!! Great work Vidas and I can't wait for more updates with more levels and challenges!! :). This game is definitely fun to play, and the custom soundtrack just makes the experience much better. Mowing down mobs of enemies with the amazing soundtrack is quite addicting.

The gameplay can be challenging, especially as you progress through the levels, if you're not aware of your surroundings then you will become overwhelmed by enemies hitting you from all sides. So make sure to use platforms to your advantage, and to stay on the move.

The level design is very creative, and it is quite enjoyable to see all the crazy designs.

For being in early access the game already offers a lot. If you like first person shooters and unique indie games then this is for sure a game to try out.. you should pick up this game to play c; i highly recommend it . its got alot of replay value indeed c; i loved playing this game c; i let's play this game on my youtube channel and enjoyed it every bit of it c; Keep it vidas i love your games and especially loved this game c; 10/10. The soundtrack is awesome and sets the mood for your gameplay. The game can be a bit hard, but once you get a feel for it you
