Fun game with a great dev team, limited hours played so far but looking forward to more as they keep pumping out big updates all the time. :). Oh my! Oh my, oh my! That is really all I can say for this game. It is absolutely beautiful. Depending on the music you put with it, it can be relaxing, hectic, chaotic, blissful...anything! If you do not own this game, GET IT NOW! Might I recommend using the song called 'Promise' from Thomas Bergersen's 'Illusions'.

Honestly this is a rival for audiosurf and in many ways more than a match for it! I cannot recommend this enough!. Although most of the negative reviews on this state that the gameflow is rather slow, I had no problem concerning this. The fact that there are nothing written adds depth to the gameplay and makes you feel you're discovering/identifying the items and enemies you encounter. However, once I will figure out all of them I wonder if the game will have the same appeal. I have been playing roguelikes for more than 10 years and yet to complete any of the traditional ones. With Hieroglyphika, on the other hand I have figured out about 80% of the items/enemies and I have won on normal mode only in my 5th run. So I am not sure if it has the replay value of a traditional roguelike. Some extra content, items and ui improvements would be great. But it is still worth its price, especially when it is in discount.. Wouldn't recommend because you get just one more building. I Would like to play as the great dictator of tropico not a clown! The songs and voice recordings should have just been a update because i wouldn't buy this for that!. Not the game I paid for in Kickstarters, and it isnt good in the new way they are approaching it either. it petty good scary shooter game (buy sale day)

Them & Us hits all the notes as a homage to RE/SH. It was nice to have the option of playing with fixed camera and tank controls. Really looking forward to the finished product. Very happy to support a game that respects the survival horror genre's roots.

Great work guys!. Bought this at 90% off and I am using Oculus Rift. I went through the tutorial area and liked it. This game is in development and there are things still to do, but given the price point and it was on sale I think it is worth buying to see where it goes. Sometimes its nice to watch a game grow.

Only met 1 person when playing (was at off hours), but they were very helpful. Also, it is all PvE, with no PvP; I mention this as I saw a comment that stated the reverse.. Would actually be nice if they added more popular song (vocaloid, camellia, soundvoltex, XI, and those things) and reduce the DLC cost cuz it's gonna burn ur wallet for some random songs. Gameplay itself is decent although you can just play osu and download the skins, but overall i'll give this game a 8/10 for now. I've flown 109's in both IL2 CoD and IL2 BoS, and this one doesn't really fly anything like them. I feel like taking off should be much more difficult, however, if you like WW2 planes, it's not a bad add on.. Heavy Weapon is yet another PopCap game with the working formula of a simple game principle getting harder by the level. In this case, it is navigating a tank with considerable arsenal through the war-torn levels of a rather... well... it's hard to really describe it.

I can only say that I have gotten stuck on the third level a little already, which is both embarrassing and still encouraging that I just try on and on.. To be honest, this doesn't at all stand up to the second Sparkle game at all. The music is decent, although the graphics are a bit painful to look at, especially how much the Illuminati centipede glows. Illuminati centipede, in case you're wondering; {LINK REMOVED}

Unlike the previous game, this one isn't relaxing at all, as there are several quests of which are frustrating to get through. Two of them being the flower ones where you have to get through tunnels, the other being the maze one with the jellyfish. By the time you're at the maze jelly fish one, you're rather long, and if the tip of your tail so much as taps the tip of a jellyfish then you're sent to a level below. Needless to say, this is rather frustrating. I know that I haven't played for 10 hours or so, however I'm not going to spend that much time on a game that's more frustrating than it is relaxing.

In short, this game doesn't live up to the previous Sparkle game, and it lacks the soothing/calming effects of previous games.. crippled potato. Awesome OST. Boring game.
